**Application for Grease Interceptor Variance**

Building Owner

Applicant / Business Address

---

---

---

---

---

---

Nature of building use, food preparation, cooking/ cleaning facilities, dinnerware, # seats, etc.

---

---

---

Food preparation that generates and/or otherwise involves grease, oils and/or fats

---

---

---

Proposed grease interceptor/trap to be used (type and size)

---

Reason for requesting variance from standard 1000 gallon grease interceptor

---

---

I understand that a variance is only appropriate for generators of minimal quantities of grease and fats that can be effectively handled by lesser interceptor units. I further understand that if RWRA approves a variance from the standard grease interceptor for a restaurant or other food preparation facility, that this may be a temporary allowance. If the practices of the business change, or if RWRA experiences any problems associated with grease in the sewer system, RWRA can require the installation of the standard 1000 gallon grease interceptor at the owner's expense at any time. I further understand that if/when changes occur from what is described above, that I am responsible for notifying RWRA for their review of the necessary grease control facilities.
