## Application for Grease Interceptor Variance

Property Owner

Applicant / Business Address

Name: \_\_\_\_\_

Name: \_\_\_\_\_

Address: \_\_\_\_\_

Address: \_\_\_\_\_

Phone/Email: \_\_\_\_\_

Phone/Email: \_\_\_\_\_

Describe the nature of building use, food preparation, cooking/cleaning facilities, dinnerware, number of seats, menu items: \_\_\_\_\_

\_\_\_\_\_

List the food preparation or processes that generate and/or otherwise involve grease, oils, and/or fats.

\_\_\_\_\_

Proposed grease interceptor to be used (type and size) and proposed cleaning interval.

Reason for requesting variance from the grease interceptor size or specifications according to the RWRA FOG Management Policy: \_\_\_\_\_

\_\_\_\_\_

I understand that a variance is only appropriate for generators of minimal quantities of grease, oil, and/or fats that can be effectively handled by lesser interceptor units. I further understand that RWRA's approval of a variance from the general sizes and specifications outlined in the RWRA FOG Management Policy may be a temporary allowance. If the practices of the establishment change, or if RWRA experiences any problems in the sewer system associated with grease attributed to the establishment, RWRA can require the installation of an appropriately sized grease interceptor at the owner's expense at any time. I further understand that if changes occur from what is described above, I am responsible for promptly notifying RWRA.
